VAPOR
MINISTRIES

THE LEGACY OF KRIS BARR

Mrs. Kris Barr was like a second mom to Vapor Ministries founder, Micah McElveen. She lived life pouring herself out in the service of others. She gave generously to Vapor since its inception, advocated for it constantly, and served multiple board terms. In her second term, she was diagnosed with cancer. Even though she was battling for her life, she continually asked Micah for updates and shared that she wanted to beat it in part because she wanted to go back to Haiti. As her condition worsened, she contacted Micah and let him know that instead of

living to go to Haiti, she had a request for him to fulfill in her passing. She asked him to dedicate funds given by her family and friends to building the new center she would not personally see. On behalf of the entire Vapor Ministries team, we decided to honor the legacy of this most kind and extraordinary woman by naming this center, so dear to her, in her honor.

KRIS BARR FERRIER CENTER IMPACT

Rose is a 14 year old girl living in the village of Ferrier, Haiti. She has not been able to attend school regularly because her family cannot afford the fees. Her parents take any work they can find to feed the family, and any extra they have goes toward trying to keep their small home standing. During heavy rain, Rose has trouble sleeping due to the water coming in through the holes in the walls and roof. And in Rose's community, all except one of the wells dry up in the summer, and the only well that isn't dry isn't actually clean water.

Your partnership will help us reach Rose with a center that will transform her community and very likely change the course of her life and her eternity. You will help us bring her a well that won't run dry - a physical well that will sustain her body and a spiritual well that will sustain her soul.

Together, we can help thousands like Rose in Ferrier not just survive, but *flourish*.

KRIS BARR FERRIER CENTER SITE

1. league building
2. admin building
3. barn
4. mech/ elect building
5. generator
6. guard shack
7. well + well pump
8. water tower
9. pole mounted transformer

MAKING THE VISION A REALITY

God has given us the vision and opportunity to reach thousands of people in the village of Ferrier, Haiti. We have been given 15 acres of land by the Ferrier village elders, and we are actively raising funds to begin building our sixth hub of hope in this community.

The Need: The capital costs associated with this project are listed in the table to the right. To date, generous partners have sown \$350k toward this new center, leaving a need of just under \$600k to complete this ministry outreach center.

Our Promise: We treat all contributions, large and small, with tremendous care, respect, and financial discipline, our hearts and minds fixed on the dire needs of the poor and the lost, and on the magnificent promise of hope found in the Gospel. Learn about our Financial Transparency at VaporMinistries.org/Stewardship

Pre-construction Activities	\$ 8,300
Sitework, Utilities, Landscaping, & Master Water Project	\$ 494,800
Building Construction	\$ 292,800

General Conditions & Oversight	\$ 101,500
Total	\$ 947,900
Funding to Date	\$ -350,000
Remaining Need	\$ 597,900

KRIS BARR FERRIER CENTER BUILDING PLAN

The following pages explain the purpose and plan for the Kris Barr Ferrier Center buildings.

ADMIN BUILDING FLOOR PLAN

We believe in equipping locals to lead the effort to transform their community and rely exclusively on indigenous people to direct and oversee all ministry activities and programs. This empowers locals with inherent leadership ability to serve their community for God's glory.

The admin building provides office and gathering space designed to increase our efficiency and effectiveness with regards to our mission. Group meeting spaces and individual offices are designed to strengthen our shared culture and provide focus for our mission. The admin building is essential infrastructure that intentionally supports a unified heartbeat that is shared throughout all center activities.

LEAGUE BUILDING FLOOR PLAN

The league building will house the physical supplies needed to run our discipleship leagues such as jerseys, balls, nets, whistles, cones, discs, chalk, bibs, pumps, ball bags, and more. This building will also include modern restroom facilities and changing rooms. Hundreds of children, youth, and adults will use this facility daily as they come to the center to play the game they love and hear about the One who loves them.

BARN FLOOR PLAN

The Barn at the Ferrier center is a multipurpose building used for both storage and revenue generation.

Three-fourths of the Barn will be dedicated to our International Profit Centers department for the production of Haitian goods and agricultural products to be sold online or in local markets to offset a portion of the ministry's operating expenses.

The remainder of the space is where our Ferrier center Grounds Team will store their lawn & landscaping equipment as well as all of the carpentry tools, maintenance supplies, and rough hardware needed to maintain an excellent facility.

YOUR LEGACY

The investment you make in Ferrier will impact lives today and souls for eternity all while honoring a woman who lived to serve others in the name of Jesus. We ask that you prayerfully consider partnering with us to leave a legacy for the good of the poor and lost and for the glory of God.

Please reach out with any questions. We look forward to meeting needs, feeding souls and elevating God with you.
